- Security requirements for applications when using digital certificates
- Manual – How to use electronic signature in the company
- Tool kit for verifying software solutions
- Instructions for electronic archiving

Current situation in Slovenia

- Mass usage of e-SLOG invoice
- Slovenia ranked 9. in Europe in the number of e-invoices
- e-invoice is used by all companies with mass invoicing
- E-Slog standards are integrated in majority of ERP systems
- Established e-invoice system over electronic banks
- Establishment of e-business users register

E-invoice banking system

E-invoice banking system

- Banks enable simple payment of received e-invoices, e-invoices storage in e-banks and e-archive.
- Provides the user with the same technical conditions and standards, no matter where the user entry in the system
- Provide users with complete information about the status of an e-documents exchange
- It uses all existing e-banks for documents exchange with all safety items (Quality certificates, e-signature);

E-invoices in Public sector

WHY:

- Reduction of operating costs in the public sector
- Improving the response time in business processes management
- Reduction of errors in financial management
- Business transparency
- Economy costs reduction

e-invoices in public sector

HOW:

- Usage of e-SLOG standardized formats of electronic documents
- Security based on PKI infrastructure
 - Single entry point for Public Administration (PPA)
- Usage of e-invoices for different environments:
- Integrated e-invoice in the financial system of Public administration
- established rules for the transmission of e-invoices
- Established connection with all e-invoices networks
- Established portal to work with e-invoicing

e-invoices in public sector

Current status:

- Integrated process of e-invoices in the financial system of Public administration
- Established rules for the exchange of e-invoices
- Implemented a model e-invoice project in the public sector
- Established connection with all e-invoicing networks
- Adoption of a legislation for mandatory use of e-invoicing in the public sector is in the process
- Legislation implementation 1. 1. 2014
- Mandatory use of e-invoices 1. 1. 2015

Thank you !
