 - European Council of Civil Engineers (ECCE), from year 2000
 - World Federation of Engineering Organisations (WFEO), from year 2001
 - European Council of Engineering Chambers (ECEC), from year 2003
 - The Council of European Geodetic Surveyors (CLGE) from year 2009

IZS functions

- Main IZS functions:
 - ensuring the provision of professional examinations (for responsible project design, responsible works management, responsible auditing, responsible land surveyors),
 - administering a register of authorised engineers,
 - promoting and organising further professional training,
 - informing members,
 - setting out professional principles (good praxis),
 - conducting supervision of the observation of the IZS code of professional ethics,
 - international cooperation.
- IZS performs the functions specified in points 1 and 2 as a public authorisation pursuant to the provisions of construction act and provisions of the act of law governing the performance of land surveying activities.

IZS bodies

Members according to sections

More than 7000 certified engineers
are members of 6 sections:

- Civil engineers (MSG-41%)
- Mechanical engineers (MSS-22%)
- Electro engineers (MSE-27%)
- Engineers of technology
and other engineers (MST-4%)
- Engineers of mining and
geotechnology (MSR-2%)
- Land surveyors (MSGeo-4%)

■ MSG ■ MSS ■ MSE ■ MST ■ MSR ■ MSGeo

IZS members according to authorisations

- Engineers have different authorisations / professional qualifications:
 - responsible project designers (RPD)
 - responsible auditors (RA)
 - responsible works managers (RWM)
 - responsible land surveyors (RS)
- Professional qualifications are defined in and protected by Construction Act

Thank you for your attention.
